

Chapter 7

Control and Coordination

1. Control and coordination are functions of:

- A) Respiratory system
- B) Nervous and endocrine systems
- C) Circulatory system
- D) Excretory system

Answer: B) Nervous and endocrine systems

2. The structural and functional unit of the nervous system is:

- A) Brain
- B) Neuron
- C) Spinal cord
- D) Nerve

Answer: B) Neuron

3. The gap between two neurons is called:

- A) Synapse
- B) Axon
- C) Dendrite
- D) Nucleus

Answer: A) Synapse

4. Information is transmitted from one neuron to another through:

- A) Electrical signals only
- B) Chemical signals (neurotransmitters)
- C) Hormones
- D) Enzymes

Answer: B) Chemical signals (neurotransmitters)

5. Which part of the neuron receives impulses?

- A) Axon
- B) Dendrites
- C) Myelin sheath
- D) Nucleus

Answer: B) Dendrites

6. Which part of the brain controls voluntary actions?

- A) Medulla**
- B) Cerebrum**
- C) Cerebellum**
- D) Pons**

Answer: B) Cerebrum

7. Which part of the brain maintains posture and balance?

- A) Cerebrum**
- B) Cerebellum**
- C) Medulla**
- D) Spinal cord**

Answer: B) Cerebellum

8. The part of the brain that controls involuntary actions like heartbeat and breathing is:

- A) Cerebrum**
- B) Cerebellum**
- C) Medulla oblongata**
- D) Midbrain**

Answer: C) Medulla oblongata

9. The largest part of the human brain is:

- A) Cerebellum**
- B) Cerebrum**
- C) Pons**
- D) Medulla**

Answer: B) Cerebrum

10. Reflex actions are controlled by:

- A) Brain**
- B) Spinal cord**
- C) Cerebellum**
- D) Pons**

Answer: B) Spinal cord

11. Which of the following is an example of a reflex action?

- A) Walking**
- B) Thinking**
- C) Blinking of eyes**

D) Talking

Answer: C) Blinking of eyes

12. Which hormone controls the sugar level in blood?

A) Adrenaline

B) Thyroxine

C) Insulin

D) Estrogen

Answer: C) Insulin

13. Which gland secretes insulin?

A) Pituitary

B) Pancreas

C) Thyroid

D) Adrenal

Answer: B) Pancreas

14. The master gland in the human body is:

A) Adrenal gland

B) Pituitary gland

C) Thyroid gland

D) Pineal gland

Answer: B) Pituitary gland

15. Which gland secretes the 'fight or flight' hormone?

A) Adrenal gland

B) Thyroid gland

C) Pituitary gland

D) Pancreas

Answer: A) Adrenal gland

16. Which hormone regulates the rate of metabolism?

A) Insulin

B) Adrenaline

C) Thyroxine

D) Testosterone

Answer: C) Thyroxine

17. The hormone responsible for growth in humans is:

- A) Adrenaline**
- B) Growth hormone**
- C) Estrogen**
- D) Thyroxine**

Answer: B) Growth hormone

18. The hormone responsible for secondary sexual characters in males is:

- A) Estrogen**
- B) Testosterone**
- C) Progesterone**
- D) Insulin**

Answer: B) Testosterone

19. The hormone responsible for secondary sexual characters in females is:

- A) Testosterone**
- B) Estrogen**
- C) Insulin**
- D) Thyroxine**

Answer: B) Estrogen

20. Tropic movements in plants are due to:

- A) Nerves**
- B) Hormones**
- C) Muscles**
- D) Enzymes**

Answer: B) Hormones

21. The hormone responsible for phototropism in plants is:

- A) Gibberellin**
- B) Auxin**
- C) Cytokinin**
- D) Ethylene**

Answer: B) Auxin

22. The movement of a plant towards light is called:

- A) Geotropism**
- B) Hydrotropism**
- C) Phototropism**

D) Thigmotropism

Answer: C) Phototropism

23. The movement of roots towards gravity is known as:

A) Phototropism

B) Geotropism

C) Chemotropism

D) Hydrotropism

Answer: B) Geotropism

24. Which plant hormone helps in the ripening of fruits?

A) Cytokinin

B) Auxin

C) Ethylene

D) Gibberellin

Answer: C) Ethylene

25. The plant hormone responsible for cell division is:

A) Cytokinin

B) Auxin

C) Gibberellin

D) Ethylene

Answer: A) Cytokinin

26. Which hormone promotes cell elongation in plants?

A) Auxin

B) Ethylene

C) Cytokinin

D) ABA (Absciscic Acid)

Answer: A) Auxin

27. The plant movement independent of direction of stimulus is called:

A) Nastic movement

B) Tropic movement

C) Phototropism

D) Geotropism

Answer: A) Nastic movement

28. The main function of abscisic acid (ABA) is:

- A) Growth promotion**
- B) Cell division**
- C) Inhibition of growth and closure of stomata**
- D) Ripening of fruits**

Answer: C) Inhibition of growth and closure of stomata

29. In plants, coordination is controlled by:

- A) Nervous system**
- B) Hormonal system only**
- C) Muscles**
- D) Reflexes**

Answer: B) Hormonal system only

30. The brain is protected by:

- A) Ribs**
- B) Skull**
- C) Spine**
- D) Vertebrae**

Answer: B) Skull
