

Chapter 8

How Do Organisms Reproduce?

1. The process by which organisms produce new individuals of the same kind is called:

- A) Regeneration
- B) Reproduction
- C) Budding
- D) Fragmentation

Answer: B) Reproduction

2. Which of the following is *not* a mode of asexual reproduction?

- A) Binary fission
- B) Budding
- C) Fertilization
- D) Spore formation

Answer: C) Fertilization

3. Binary fission occurs in:

- A) Yeast
- B) Amoeba
- C) Hydra
- D) Spirogyra

Answer: B) Amoeba

4. Budding occurs in:

- A) Amoeba
- B) Hydra
- C) Plasmodium
- D) Paramecium

Answer: B) Hydra

5. Spore formation takes place in:

- A) Yeast
- B) Amoeba
- C) Rhizopus
- D) Hydra

Answer: C) Rhizopus

6. Regeneration occurs in:

- A) Hydra**
- B) Planaria**
- C) Yeast**
- D) Amoeba**

Answer: B) Planaria

7. The ability of a cell to divide and form a complete organism is called:

- A) Differentiation**
- B) Totipotency**
- C) Fragmentation**
- D) Budding**

Answer: B) Totipotency

8. Vegetative propagation in potato takes place by:

- A) Roots**
- B) Leaves**
- C) Stem tuber**
- D) Seeds**

Answer: C) Stem tuber

9. Bryophyllum reproduces vegetatively by:

- A) Leaf buds**
- B) Stem**
- C) Root**
- D) Flower**

Answer: A) Leaf buds

10. The mode of reproduction in which only one parent is involved is:

- A) Asexual reproduction**
- B) Sexual reproduction**
- C) Binary fusion**
- D) Fertilization**

Answer: A) Asexual reproduction

11. Which of the following statements about sexual reproduction is true?

- A) It involves only one parent**
- B) It results in genetically identical offspring**
- C) It involves fusion of gametes**

D) It occurs only in animals

Answer: C) It involves fusion of gametes

12. Male gamete in humans is:

A) Ovum

B) Sperm

C) Zygote

D) Embryo

Answer: B) Sperm

13. Female gamete in humans is:

A) Ovum

B) Sperm

C) Zygote

D) Embryo

Answer: A) Ovum

14. Fertilization is the process of:

A) Division of gametes

B) Fusion of gametes

C) Reproduction by budding

D) Spore formation

Answer: B) Fusion of gametes

15. Where does fertilization take place in humans?

A) Ovary

B) Oviduct (fallopian tube)

C) Uterus

D) Cervix

Answer: B) Oviduct (fallopian tube)

16. The zygote divides repeatedly to form:

A) Ovum

B) Embryo

C) Sperm

D) Foetus

Answer: B) Embryo

17. The organ where the embryo gets nourishment and grows in humans is:

- A) Ovary**
- B) Uterus**
- C) Oviduct**
- D) Fallopian tube**

Answer: B) Uterus

18. Which of the following is a sexually transmitted disease (STD)?

- A) Diabetes**
- B) AIDS**
- C) Tuberculosis**
- D) Asthma**

Answer: B) AIDS

19. The causative agent of AIDS is:

- A) HIV**
- B) HCV**
- C) HBV**
- D) HSV**

Answer: A) HIV

20. Which of the following is not a contraceptive method?

- A) Condom**
- B) Oral pills**
- C) IUD**
- D) Antibiotics**

Answer: D) Antibiotics

21. The process of fusion of male and female gametes is called:

- A) Regeneration**
- B) Fertilization**
- C) Budding**
- D) Fission**

Answer: B) Fertilization

22. In human males, sperm are produced in:

- A) Testes**
- B) Penis**
- C) Prostate gland**

D) Urethra

Answer: A) Testes

23. In human females, ovum is released from:

A) Uterus

B) Oviduct

C) Ovary

D) Vagina

Answer: C) Ovary

24. The periodic release of ovum from the ovary is called:

A) Menstruation

B) Ovulation

C) Fertilization

D) Implantation

Answer: B) Ovulation

25. The removal of unwanted pregnancies is called:

A) Fertilization

B) Ovulation

C) Abortion

D) Implantation

Answer: C) Abortion

26. Which part of the male reproductive system provides fluid for sperm movement?

A) Testes

B) Seminal vesicle

C) Urethra

D) Vas deferens

Answer: B) Seminal vesicle

27. Which part of the female reproductive system opens into the outside environment?

A) Uterus

B) Ovary

C) Vagina

D) Oviduct

Answer: C) Vagina

28. Asexual reproduction produces:

- A) Genetically identical offspring**
- B) Genetically different offspring**
- C) Both**
- D) None**

Answer: A) Genetically identical offspring

29. Which of the following methods of contraception prevents both fertilization and transmission of STDs?

- A) Oral pills**
- B) Condom**
- C) IUD**
- D) Surgery**

Answer: B) Condom

30. Which of the following organisms reproduces by multiple fission?

- A) Amoeba**
- B) Plasmodium**
- C) Yeast**
- D) Hydra**

Answer: B) Plasmodium
